 @hncnetball

The Huddersfield New College netball team train twice a week and play fixtures on Wednesdays. They play in the British College of Sport framework which consists of a league and cup structure: these fixtures take place across North East England. The Netball Team benefit from the College's £600,000 Sports Barn, with all training and matches taking place in this new facility.

With the completion of the Sports Barn has come a new partnership with Huddersfield Giants' Netball team. The club bases its entire junior section at the college and this will hopefully become a long and fruitful relationship between the two institutions.
